

Job title	General Manager
Department	Sales
Location	Malaysia
1st Reporting Officer	Regional Sales Director
2nd Reporting Officer	CEO

Job Summary:

The **General Manager** is responsible for overseeing business operations in Malaysia, ensuring strategic growth and operational excellence. This role involves **managing SAP Business One projects**, leading cross-functional teams, and driving successful project execution from planning to post-implementation support. The Country Manager will also be accountable for **business development, market expansion, and local compliance**, working closely with clients, vendors, and stakeholders to strengthen the company's presence. Additionally, the role requires **strong leadership in managing the local team, ensuring alignment with regional and corporate objectives, and driving innovation and continuous improvement** in both project delivery and business operations.

Job Responsibilities:

SAP Business One Project Management

- Plan and execute end-to-end SAP Business One projects, ensuring timely delivery within scope and budget.
- Collaborate with clients to gather requirements, design solutions, and manage data migration, testing, and system go-live.
- Lead cross-functional teams, ensuring high-quality implementation and post-project support.
- Identify risks and implement mitigation strategies to maintain project momentum.
- Build strong relationships with clients to ensure satisfaction and future opportunities.

Malaysia Country Management

- Oversee all aspects of the Malaysia office, including business operations, compliance, and financial performance.
- Develop and execute market entry and growth strategies to strengthen the company's presence in Malaysia.
- Establish and nurture partnerships with local clients, vendors, and stakeholders.

- Manage a local team, providing leadership, coaching, and support to drive performance.
- Ensure alignment with corporate policies, objectives, and standards.
- Represent the company at industry events and meetings to enhance brand visibility and credibility.

Leadership & Strategic Planning

- Align project and country strategies with overall regional goals.
- Monitor market trends and identify opportunities for business expansion.
- Drive innovation and continuous improvement in both project delivery and local operations.

Job Qualifications:

- Bachelor's degree in Business Administration, Information Technology, or a related field.
- Minimum of 3 - 5 years of experience in SAP Business One project management
- Proven leadership experience in managing teams or business operations
- **Technical Skills.** Strong understanding of SAP Business One modules and system integration
- **Management Skills.** Strategic Planning, Team Leadership and Operational Management
- **Soft Skills.** Exceptional communication, problem - solving and interpersonal skills
